# SATA Connectors

EDAC E-Sata Connectors are an established computer bus solution interconnecting mass storage devices in a system. E-Sata has similar infrastructure to standard USB's but utilizes 7 contacts. Both data and power can be transmitted through a single connector.

Features

- Single port 7 contacts
- Plating options from gold flash to 30u" gold
- Right angle or vertical orientation
- Standard or high temp Insulators available
- Synchronous and asynchronous data transfers
